In Memory of Marion Cinquemani Madden and John Mathew Madden

My beloved maternal grandparents

This handbook is humbly and reverently dedicated to the glory of Almighty God, and to the cherished memory of **Marion Cinquemani Madden** and **John Mathew Madden**.

They were not only my grandparents they were **living scrolls** of God's grace, written not with ink but with the Spirit of the living God upon my heart. Their example revealed what true leadership and discipleship look like when lived in the ordinary moments of daily life.

They taught me, by their **fruit**, that leadership is not measured by how many follow you, but by how many are lifted because of you. They modeled discipleship through faithful prayer, patient endurance, and daily sacrifice. They embodied love that healed wounds and mercy that restored dignity.

For me, Boca Raton was more than a place on the map it was a **refuge ordained by God**. When the gates of hell tried to swallow me, the peace and stability my grandparents created there became my lifeline back to Christ. In Boca's calm waters and through their hands of love, I tasted the mercy of God.

Their witness is the soil from which ChristInc Global was planted. Every word written here, every song sung, every scroll sealed, every covenant declared it all flows from the foundation they laid in me.

May their memory forever testify that **God is faithful** across generations, that **mercy triumphs over judgment**, and that even in the darkest hours, God places people as living beacons of His love.

Scriptural Seal

“Remember your leaders, who spoke the word of God to you. Consider the outcome of their way of life and imitate their faith.” Hebrews 13:7 (KJV)

Preamble. Why oceans need truth more than hype

The seas are God's gift. They feed the hungry, balance the air, and carry the nations. But in our day, promises of cleanup and sustainability are riddled with half-truths. Grand pledges raise billions. Glossy reports dazzle donors. Meanwhile, fishermen are punished while industrial polluters sail free. Proverbs 11:1 warns that a false balance is an abomination. This booklet names common ocean cons and points to real stewardship.

Prologue. The floating boom that broke

A high-profile cleanup project launched plastic-catching booms across the Pacific. Cameras rolled. Donations surged. But the devices tore apart in storms, caught little debris, and left behind their own plastic footprint. The hype cycle rolled on to the next model, while everyday coastal communities still hauled ghost nets from their beaches. This disappointment taught a lesson: check results, not promises. Ask for pounds removed, fish restored, not just headlines.

Chapter 1. Gingerbread and Greenwash

Plays

- Photo ops with staged beach cleanups while industrial trawlers dump waste offshore.
- Corporate “ocean safe” seals that lack independent verification.
- Recycling pledges that reroute plastic to low-income countries where it burns in open pits.

Defenses

- Ask for audited results: tons removed, sites restored, fish counts rising.
- Support local community cleanup groups who report directly.

- Challenge certifications. Look up who owns the label and who audits it.
-

Chapter 2. Fishermen Punished, Polluters Protected

Plays

- Heavy regulation and fees on small sportsmen while factory ships get loopholes.
- Quotas cut for coastal families while subsidized foreign fleets dredge near shore.
- Scapegoating of recreational anglers for stocks actually collapsed by industrial trawlers.

Defenses

- Track catch by scale. Hold mega fleets to higher scrutiny than local boats.
 - Push for bycatch transparency: require factory ships to publish discard logs.
 - Support co-ops where fishermen agree on limits and self-police sustainability.
-

Chapter 3. Farmed Fish Fog

Plays

- Farmed salmon sold as sustainable while pens leak waste, parasites, and antibiotics.
- Mercury and PCB buildup hidden in marketing gloss.
- Feed made from wild fish, defeating the promise of less pressure on oceans.

Defenses

- Check country of origin. Some nations regulate fish farming far better.

- Prefer shellfish farms (oysters, mussels) which clean water instead of polluting it.
 - Eat lower on the chain. Sardines and anchovies pack nutrition with lower toxin load.
-

Chapter 4. Plastic Diversion

Plays

- Ocean-bound plastic credits sold like carbon credits — with little proof of collection.
- Funding spent on marketing instead of nets and gear removal.
- Headlines about straws and bags while industrial packaging dwarfs the problem.

Defenses

- Demand verifiable cleanup metrics (GPS, weight tickets, independent audits).
 - Support bans or redesigns at the packaging source, not just end-of-pipe.
 - Teach youth how to trace a product's waste footprint.
-

Chapter 5. The Clean Ocean Plan

Contracts

- Require NGOs and corporations to publish independent audits.
- Tie funding to measurable outcomes, not promises.

Money

- Channel donations to local fishery cooperatives and tribal groups with proven track records.

- Fund technologies that prevent pollution upstream (river traps, port waste capture).

Compliance

- Enforce ballast water, bilge dumping, and ghost net recovery for large fleets.
- Track mercury sources back to coal plants and mining.

Community

- Equip sportsmen as citizen scientists.
- Public dashboards of fish stocks, bycatch, and cleanup efforts.

Faith and ethics

- Steward the seas as God commanded Adam to steward the garden.
 - Honest weights in fisheries. Real numbers, not inflated catch reports.
 - Equity: let those who profit most pay most for cleanup.
-

Chapter 6. Checklists and Scripts

NGO checklist

- Who audits them?
- Pounds collected last year?
- What percent goes to program vs marketing?

Seafood script

Customer: Where is this fish from?

Seller: It's farmed.

Customer: What country? What feed? Any third-party certification?

Policy script

Citizen: The new quota cuts hurt locals. What penalties are on industrial fleets?

Official: We monitor them.

Citizen: Show me bycatch logs and enforcement records.

Chapter 7. Scripture Quick List

- Genesis 1:28. Fill the earth and subdue it, have dominion — stewardship, not exploitation.
- Proverbs 11:1. A false balance is an abomination.
- Ezekiel 34:18. Must you trample the pasture and muddy the waters?
- Revelation 8:9. A third of the living creatures in the sea died — a warning.
